

Horticulture at the World's Fair.

Chief Samuels values plants at present on hand at the World's Fair grounds in Chicago at \$200,000, and he is credited with declaring that the collection of large decorative plants has not its equal in the United States. The giant ferns from Japan and Australia, grouped in the center of the rotunda, have developed their fronds, increasing rapidly in circumference. The rotunda contains also a number of Japanese maples, a pine 200 years old, cinnamom trees, etc. This exhibit is rapidly increased by new consignments arriving almost daily.

In the greenhouse are nearly four thousand primroses grown from seed sent from Italy, Germany, France, Great Britain and the United States. Of pansies Germany and France have made special exhibits, also Belgium and Holland. Another greenhouse division contains thousands of Persian violets and South American orchids; among the latter are rare cow's horn from Costa Rica. In connection with the horticultural exhibit 40,000 hardy roses have been planted on the wooded island and 40,000 more of tender varieties are promised for next summer.—New York World.

What a Cup of Chocolate Can Do.

An enthusiastic lover of chocolate affirms that for those who wish to keep the imagination fresh and vigorous chocolate is the beverage of beverages. However copiously you have lunched a cup of chocolate immediately afterwards will produce digestion three hours after and prepare the way for a good dinner. It is recommended to every one who devotes to brain-work the hours he could pass in bed; to every wit who finds he has become suddenly dull; to all who find the air damp, the time long and the atmosphere insupportable; and, above all, to those who, tormented with a fixed idea, have lost their freedom of thought.—New York World.

Why They Are Speckled.

Charley Wilcox was in the burg the other day exercising his team of speckled colts. The way the animals happened to be speckled happened in this way: While their mother was at Hat Creek drinking, one day, she was seized by the lip by a trout weighing at least twenty pounds. The fish had to be killed with an ax before it would release its hold and when the twin colts were born they were speckled like trout. They are an extra fine team and are peculiarly fond of water.—Burney Valley (Cal.) Bulletin.

An Expert's Opinion.

Our readers have doubtless noticed the numerous discussions by the scientists and hygienists as to the relative value of the various baking powders. A careful sifting of the evidence leaves no doubt as to the superiority of the Royal Baking Powder in purity, wholesomeness and strength, from a scientific standpoint. An opinion, however, that will have perhaps greater influence upon our practical housekeepers, is that given by Marion Harland, the well known and popular writer, upon matters pertaining to the science of domestic economy, of housekeeping, and of home cooking. In a letter published in the Philadelphia Ladies' Home Journal, this writer says:

"I regard the Royal Baking Powder as the best manufactured and in the market, so far as I have any experience in the use of such compounds. Since the introduction of it into my kitchen I have used no other in making biscuits, cakes, etc., and have entirely discarded for such purposes the home-made combination of one-third soda, two-thirds cream of tartar.

"Every box has been in perfect condition when it came into my hands, and the contents have given complete satisfaction. It is an act of simple justice, and also a pleasure, to recommend it unqualifiedly to American housewives." MARION HARLAND.

Horseshoe For Food.

In Europe, where the horse is every year more used as human food, the animals are not allowed to become a mass of skin and jagged bones, as old horses often do here. They are fattened, and even an old horse can be made quite fat if given succulent food mixed with ground grain. It is no more difficult to fatten an old horse than it is to fatten an old cow.—Boston Cultivator.

Mrs. Ogden Snyder, Albany, N. Y.

"I Owe My Life to Hood's Sarsaparilla"

"Words are powerless to express the gratitude I feel toward Hood's Sarsaparilla, for under God, I feel and know that to this medicine I owe my life. Twelve years ago I began to bleed, followed by nausea at the stomach, and later with swellings of the limbs, accompanied by severe pain. This gradually grew worse until three years ago. Physicians told me the trouble was

Caused by a Tumor

For several months I had been unable to retain any food of a solid nature. I was greatly emaciated, had frequent hemorrhages, and was satisfied the doctors were right in saying my life was nearly over. One day a friend suggested that I try Hood's Sarsaparilla; I did so, and for 3 or 4 days I was sicker than ever, but I kept on and gradually began to feel better.

I began to feel hungry

Could, after a time, retain solid food, increased in weight, the saffron hue left my skin, the bloating subsided, and I felt better all over. For the past two years my health has been

Hood's Cures

Sarsaparilla quite good, and I have been able all the time to do the housework for my family. "MRS. OGDEN SNYDER, No. 10 Judson St., Albany, N. Y.

Hood's Pills are the best after-dinner Pills, as dist digestion, cure headache. Try a box.

MOTHER'S FRIEND

A remedy which, if used by Wives about to experience the pangs of childbirth, proves an infallible specific for, and obviates the tortures of confinement, and the dangers thereof to both mother and child. Sent by express on receipt of price, \$1.50 per bottle, charges prepaid.

BRADFIELD REGULATOR CO., ATLANTA, GA.

ICY SPORTS.

AN INTERESTING CHAPTER ON WINTER AMUSEMENTS.

Early Uses of the Iron Blade—Skating in Holland and England—Speedy Skaters Records—Delights of Tobogganing.

THE origin of skating as a method of progression is, according to the New York Sun, buried in the obscurity of the early ages. The most ancient historians mention it as a characteristic of the Scandinavian, German and other tribes of the North of Europe. That a trace of it cannot be found among the exercises of the Greeks and Romans is not supposed to indicate a doubt of its antiquity, so much as a scarcity of ice in those latitudes. The discovery of iron and its general utility gave the first crude idea of the skate now in universal use.

Previously the Baltic borderer worried

SALE-SKATING AND ICE YACHTING.

along contentedly on snowshoes and runners made of wood. It is supposed that during their frequent visits to England in the Eleventh Century they paraded this National accomplishment, for history shows that the English sports of the Twelfth Century had become adepts in the art. One authentic record written in 1180 says, "Many young men play on the ice, some tie bones to their feet and under their heels, and showing themselves with a little picked

SPICES AGAINST SKATES.

staffe, do slide as swiftly as a bird flyeth in the air or an arrow out of a cross-bow."

The iron blade was brought into use in 1572, when the Dutch naval feet was frozen in at Amsterdam. A rival power sent its troops to capture the vessels, but the Dutch musketeers sallied forth on skates and routed the invaders in short

A RACE ON A TOBOGGAN SLIDE.

order. Ever since it has been very difficult to beat the Dutch on skates, either in peace or war. The peculiar conformation of Holland makes it the paradise of the Old World skater. Communication is chiefly maintained by a network of canals, and when these are frozen over the art of skating develops from a pastime into an almost indispensable mode of progression. Every native is an expert, and blades there are in more common use in winter than rubbers on Broadway. An advocate of woman's rights would

be charmed to see the weaker sex glide around with their marketing wares on their heads and their knitting in their busy fingers. Girls' races have been an institution since the beginning of the present century, while more than one instance is quoted where a male champion has succumbed to the superior speed of these swift-skating damsels.

Sports and pastimes on ice have been characteristic of every rigorous winter in England since the reign of Charles II., but actual racing did not attract general attention until about half a century ago. Moskaters, of England, and Charles June, of America, were then the pre-eminent exponents of the art in their respective countries. June was supplanted by T. Donoghue, of Newburg, father of the present champion, while Moskaters passed his title on to Larnen Register. The race in which the latter won the English championship is alleged to have been the first in which an accurate record of time was kept. The winner was credited with covering the distance in six minutes thirty-five seconds.

In 1854 the English championship was won by William Smart, more familiarly known as Turkey. His most dangerous rival was W. "Gutta Percha" See. See's son, George, and Turkey's nephew, George Fish Smart, ousted their veteran relatives in 1878, and since

sevenths of a mile in circuit, was 2 minutes 59 1/2 seconds. Donoghue did 2 minutes 59 1/2 seconds on a small path, at Minneapolis, December 20, 1889, and covered a mile on a three-lap course, at Orange Lake, March 8, 1890, in 2 minutes 59 1/2 seconds. Skating straightaway, with the wind, on the Hudson. February 1, 1887, Donoghue made one mile in 2 minutes 12 3/5 seconds. Last January he went a half mile under similar conditions in 1 minute 52 1/2 seconds, reaching the quarter in 35 seconds. His fastest half mile in a circuit was 1 minute 30 2/5 seconds at Newburgh, February 7, 1891. Norseng made the distance in 1 minute 22 2/5 seconds at Amsterdam, January 31, 1890.

Since the above was written Joe Donoghue, the American champion, has beaten the world's record at 100 miles, skating that distance against two competitors at Stamford, Conn., in 7 hours 11 minutes and 38 1/2 seconds.

Changing the subject from skating to tobogganing, we quote from an illustrated article in Frank Leslie's as follows: The Essex County Club at Orange, N. J., is the oldest toboggan club in the vicinity of the metropolis, and the only survivor of the many which were established several years ago. Orange is noted as a social centre, and tobogganing is the winter fad of the fashionable and select. Parties from New York and adjacent cities frequently visit the slides, and the scene on a fair night is one of great brilliancy.

The costumes of the tobogganers consist of the regulation Canadian blanket suit, dark blue with red trimmings. As shown in our illustration, the slide consists of two parallel troughs about five feet wide, with sloping sides, extending a third of a mile up the mountain. The course is lighted by electricity. Snow is not depended upon for the road bed. This is made when necessary by pouring water down the slope, which freezes even in moderately cold weather. The lower end of the slides is elevated somewhat from the valley, the elevation serving to reduce the momentum of the sleds. At times it is found necessary to use sawdust to break the speed, and the haystack is in all cases employed as a bumper at the finishing point. The speed often attained by the riders is really terrific to nervous people, but after two or three descents the most timid become courageous and find the utmost enjoyment in the sport.

The gentlemen of the Essex County Club are most agreeable hosts. Their

quarters are cheerful and supplied with everything necessary to generous hospitality. The large meeting room is warmed by a great hearth fire, and along the side of the room facing the slides there is a glass front, enabling the visitors in the intervals of their sport to look out upon the scene below. The club-room decorations of skins and snowshoes afford suggestions of a Canadian winter. In fact, the whole appearance of the place reminds one of winter sporting scenes in Montreal. It is hard for one to realize, amid such surroundings, that he is standing on a Jersey hillside.

As a means of healthful recreation tobogganing may claim a high place among winter sports. It is certain that the young lady who spends an evening on the Orange slide will need no cosmetic to bring the roses to her face.

Oriental Rugs.

It has always been a popular belief that the manufacture of rugs in the Orient was carried on by men almost exclusively, but it is said that women do most of the work. In Aiden, as no other occupation is pursued to any extent, the whole province is almost entirely supported by the labor of women. This is "women's rights" with a vengeance!—New York Journal.

An Unpleasant Outlook.

At the Ottawa (Canada) Central Station experiments are being carried on with feeding cattle with ensilage composed of corn, beans and sunflower seeds.

A RACE ON A TOBOGGAN SLIDE.

16 seconds.

Norseng's fastest three miles is 9 minutes 26 1/2 seconds, on a half-mile circuit, at St. Petersburg, February 15, 1890. On a similar circuit Joe Donoghue skated three miles, at Newburgh, February 7, 1891, in 9 minutes 19 1/5 seconds. At Heerenveen, Holland, December 18, 1890, Donoghue went three miles on a mile circuit in 9 minutes 17 seconds. Norseng's record for one mile at Hamburg, January 23, 1891, around a path about three-

sevenths of a mile in circuit, was 2 minutes 59 1/2 seconds. Donoghue did 2 minutes 59 1/2 seconds on a small path, at Minneapolis, December 20, 1889, and covered a mile on a three-lap course, at Orange Lake, March 8, 1890, in 2 minutes 59 1/2 seconds. Skating straightaway, with the wind, on the Hudson. February 1, 1887, Donoghue made one mile in 2 minutes 12 3/5 seconds. Last January he went a half mile under similar conditions in 1 minute 52 1/2 seconds, reaching the quarter in 35 seconds. His fastest half mile in a circuit was 1 minute 30 2/5 seconds at Newburgh, February 7, 1891. Norseng made the distance in 1 minute 22 2/5 seconds at Amsterdam, January 31, 1890.

DISTANCE SKATING.

Since the above was written Joe Donoghue, the American champion, has beaten the world's record at 100 miles, skating that distance against two competitors at Stamford, Conn., in 7 hours 11 minutes and 38 1/2 seconds.

Changing the subject from skating to tobogganing, we quote from an illustrated article in Frank Leslie's as follows: The Essex County Club at Orange, N. Repulsive Alaskan Customs.

"The natives of Southeastern Alaska," said ex-Governor A. P. Swinford, of Alaska, to the Star representative, "are rapidly falling into the customs of Americans, particularly as to their dress, some of the better class of natives dressing even better than the American residents. It was formerly the custom in Southeastern Alaska for the women to wear a 'labret' or short piece of bone or steel in their lower lip by way of ornament. Now one observes it only among the old women. Along the Bering Sea the men thus puncture their lips. They begin with a small piece of steel or bone no larger than a needle and gradually increase the size until it measures nearly an inch in diameter. The bigger the 'labret' the more pleased and important feels the native. Men and women alike plaster their faces with a thick coating of black paste obtained from grinding a sort of soft rock. They say it keeps the features warm in winter and protects them in summer from the attacks of insects and troublesome flies. As a race the people are under size and not personally attractive, though at Sitka one may see some splendid specimens of muscular development among the men, while some of the young women are good looking. There are now four newspapers published in the Territory and it is progressing satisfactorily. My stay there was very pleasant and I made many warm friends."—Washington Star.

How a Snake Swallows a Frog.

The method of swallowing is a very simple one, although, if the frog be large, more than half an hour may be consumed in the process. The two bones of the lower jaw are separate and capable of independent movement; so the reptile loosens it hold upon one side of its jaw, and, pushing that side forward as far as possible, it drives the teeth in again, and then draws the jaw back to its original position. The result is that the prey is drawn down by the movement. The process is then repeated by the other half of the jaw, thus inevitably forcing the victim inward. The snake's skin stretches enormously, and the jaw is, of course, dislocated, but the extensible ligaments hold the bones together. The disproportion between the diameter of the frog and the serpent's slender neck is indeed marvellous, and snakes have been observed to split themselves open by attempting too ambitious a mouthful. After perhaps half an hour of laborious contortions, all that is seen of the poor frog is a great swelling that the contracting muscles are rapidly forcing down the reptile's neck. If one liberates the captured frog before it is too late, the wretched animal often seems to overcome by fear, or perhaps stupefied by the serpent's saliva, that it will not leap, but crawls in a painful manner.

You must not allow ourselves to be duped into a mistaken sympathy, however, for such is the poetic justice of the case. Large frogs esteem small snakes a particular delicacy.—Popular Science Monthly.

Cataract Can't Be Cured

With local applications, as they cannot reach the seat of the disease. Cataract is a blood or constitutional disease, and in order to cure it you have to take internal remedies. Hall's Cataract Cure is taken internally, and acts directly on the blood and mucous surface. Hall's Cataract Cure is no quick medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing cataract.

SAN FRANCISCO, CAL. NEW YORK, N.Y.

SPEED SKATING.

SHILOH'S CURE.

Cures Consumption, Coughs, Croup, Sore Throat. Sold by all Druggists on a Guarantee.

The Deadly Cancer.

The hope is entertained that science may yet be able to subdue the "damning and deadly cancer." Recent study of cancer may not only indicate that it is an organic growth, but almost certainly proves that it is liable to the attack of another parasite. Better acquaintance with the relations of these parasites may possibly bring the long sought method of arresting cancer.—Detroit Free Press.

In Downing's "Fruits and Fruit Trees of America," there are 983 varieties of pears in his catalogue, eleventh edition, 1851. Since that time nearly 500 have been added.

Few "Kid" Gloves are Made of Kid.

Kid gloves are not made of kid; in fact, few of them are. The cheap ones are not kid and neither are the dearest ones. Ladies' gloves that cost under a dollar and a half or two dollars a pair are all made of lamb skin. It is likely that gloves paid for at a higher price than that will be of kid, but the very best and most expensive kid gloves are made of the skins of young colts.—New York Sun.

The Languedoc Ship Canal, in France, by a short passage of 148 miles, saves a sea voyage of 2000 miles by the Straits of Gibraltar.

None But Royal

BAKING POWDER is absolutely pure. No other equals it, or approaches it in leavening strength, purity, or wholesomeness. (See U. S. Gov't Reports.) No other is made from cream of tartar specially refined for it and chemically pure. No other makes such light, sweet, finely-flavored, and wholesome food. No other will maintain its strength without loss until used, or will make bread or cake that will keep fresh so long, or that can be eaten hot with impunity, even by dyspeptics. No other is so economical.

The Baking Powders now being offered in this vicinity, with the statement that they are "as good as Royal," have been shown by the official analyses to be composed of alum and detrimental to health.

The official chemists of the United States and Canada, State analysts, municipal boards of health, and physicians indorse the great qualities of the Royal Baking Powder.

R. R. R. RADWAY'S READY RELIEF.

CURES AND PREVENTS Colds, Coughs, Sore Throat, Influenza, Bronchitis, Pneumonia, Swelling of the Joints, Lumbago, Inflammations, Rheumatism, Neuralgia, Frostbites, Chilblains, Headache, Toothache, Asthma, DIFFICULT BREATHING.

CURES THE WORST PAINS in from one to twenty minutes. NOT ONE HOUR after reading this advertisement need any one SUFFER WITH PAIN. Radway's Ready Relief is a Sure Cure for Every Pain, Sprains, Bruises, Pains in the Back, Chest or Limbs. It was the First and is the Only PAIN EXPELLER.

That instantly stops the most excruciating pains, allays inflammation, and cures Croup, Whooping Cough, Sore Throat, Influenza, whether of the Lungs, Stomach, Bowels or other glands or organs, by one application.

A half to a teaspoonful in half a tumbler of water will in a few minutes cure Croup, Spasms, Sore Throat, Heartburn, Nervousness, Sleeplessness, Sick Headache, Diarrhoea, Dysentery, Colic, Flatulency and all internal pains.

There is not a remedial agent in the world that will cure Fever and Ague and all other Malarious Bilious and other fevers, aided by RADWAY'S READY RELIEF, so quick as RADWAY'S READY RELIEF.

Fifty cents per bottle. Sold by Druggists. BE SURE TO GET RADWAY'S.

Unlike the Dutch Process No Alkalies or Other Chemicals are used in the preparation of W. BAKER & CO.'S Breakfast Cocoa which is absolutely pure and soluble.

It has been analyzed and found to contain three times the strength of Cocoa mixed with Starch, Arrowroot or Sugar, and far more economical, costing less than one cent a cup. It is delicious, nourishing, and EARLY DIGESTED.

Sold by Grocers everywhere.

W. BAKER & CO., Dorchester, Mass.

Only one Sarsaparilla sold on the "NO BENEFIT—NO PAY" plan. Only one could stand the test, and that one is DANAS'.

Remember this: Danas Sarsaparilla Co., Belfast, Maine.
